

Product fact sheet - ProEquo® Sticks

ProEquo® Sticks is a complementary feed containing the bacterial strain *Lactobacillus plantarum* JI:1 (DSM 11520). The strain is isolated from the intestines of a healthy horse and is found naturally in that environment. The strain is patented based on its unique and positive effects in the horse intestines. ProEquo® Sticks is a powder product with a shelf life of one year when stored in a dry and cool environment. It is easy to handle in the stable and during transports. The product contains only natural ingredients and there is no qualifying period when using ProEquo® Sticks.

Ingredients

Maltodextrins, beta-glucans from oats.

Bacterial strain

Lactobacillus plantarum JI:1 (DSM 11520).

Bacterial content

The bacterial content of ProEquo® Sticks is approximately 80 billions CFU/stick.

Package

ProEquo® Sticks contains 6 g of active powder per stick and is packed in practical boxes with 15 sticks per box.

Dosage

Big horse: 1 stick per day, start dose 2-3 sticks per day for 5 days.

Foals and ponies (up to 300 kg): 1 stick per day, start dose 1-2 sticks per day for 5 days.

Storage

ProEquo® should preferably be kept in a dry and cool environment where it has a shelf life to the expiry date found on the bottom side of the box.

ProEquo AB

ProEquo AB is an R&D-company in the field of Functional Feed and Probiotics (living microorganisms, e.g. bacteria, with positive health effects on humans or animals).
